

SRI BALAJI

Software Engineer | Java • Spring Boot • Microservices • AWS

+91 8056690736 | LinkedIn | sribalaji581@gmail.com | Portfolio

Backend Software Engineer and AWS Certified Solutions Architect specializing in Java, Spring Boot microservices, distributed systems, and scalable cloud infrastructure, with hands-on experience in banking and credit-risk systems. Open to learning any stack or domain, with a track record of picking up new tools fast and using AI to go from zero to production-ready solutions in record time.

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS) – System Engineer

December 2023 - Present

Client: Citibank N.A. | Chennai, Tamil Nadu

Credit Decision Engine (CDE) | Credit Initiation

March 2026 - Present

- Built and enhanced REST API microservices and batch processing workflows for the Credit Decision Engine (CDE) under Credit Initiation, automating loan and card policy evaluation.
- Engineered high-throughput batch ingestion pipelines to load, parse, and validate ABD files, executing automated credit rules and risk decisioning logic.
- Developed and integrated secure REST APIs to handle real-time communication with downstream underwriting, customer verification, and account initiation services.
- Utilized modern development and productivity tools including GitHub Copilot to streamline code implementation, optimize batch routines, and increase automated test coverage.

Tech Stack: Java, Spring Boot, Spring Batch, REST APIs, Microservices, Oracle SQL Developer, Devin, GitHub Copilot, OpenShift, Jenkins, Lightspeed, Git, JIRA, Agile.

Citi Payment Float Manager (CPFM) — Modernization & Batch Optimization

October 2024 - February 2026

- Led a successful Proof of Concept (POC) migrating legacy jobs to the Spring Batch framework, earning the TCS Special Initiative Award.
- Tuned SQL queries, execution plans, and chunk-oriented processing logic, reducing end-of-day batch runtime from 2.5 hours to 1 hour (60% performance improvement).
- Implemented an end-to-end BDD test automation suite using Cucumber and JUnit, expanding regression coverage and cutting manual sprint validation effort.
- Developed operational monitoring views using ReactJS and REST APIs, and configured CI/CD deployment pipelines with Docker, Kubernetes, OpenShift, Jenkins, and Harness.

Tech Stack: Java, Spring Batch, ReactJS, JavaScript, SQL, Oracle SQL Developer, Cucumber (BDD), JUnit, OpenShift, Docker, Kubernetes, Jenkins, Harness, Lightspeed, Splunk, SonarQube, Git.

Citi Payment Float Manager (CPFM) — Core Risk & Ingestion Engine

December 2023 - October 2024

- Developed core compliance components in Citi Payment Float Manager using Java and Spring to evaluate potential risk transactions from Kafka topics and file feeds.
- Implemented transaction evaluation logic across multiple business segments, enabling automated computation of payment float and float expiry timelines.
- Collaborated with Enterprise Architecture and data teams to establish data exchange formats with ETL and First-Party Data systems for downstream processing.
- Authored technical design documentation across release cycles, conducted peer code reviews, and assisted team members with coding and unit testing standards.

Tech Stack: Java, Spring Boot, Spring Framework, Apache Kafka, File Listener, MongoDB, Oracle SQL, REST APIs, JSON, Confluence, JIRA, Agile, Scrum, Lightspeed.

Open Weaver – Software Developer

Internship | Chennai, Tamil Nadu (Remote)

May 2022 – July 2022

- Built and published reusable solution kits on the Kandi open-source platform, and conducted technical webinars and live bootcamps on web application development and software architecture for the developer community.

Tech Stack: Python, Machine Learning, Web Development, Git.

IoT Intern — SmartInternz IBM

Internship | Chennai, Tamil Nadu (Remote)

June 2021 – July 2021

- Built an IoT-enabled pet feeder on IBM Cloud with an Android companion app (MIT App Inventor 2, Node-RED) for remote scheduling, live telemetry, and MQTT-based device connectivity.

Tech Stack: IBM Cloud, Node-RED, IoT, Mobile App Development.

TECHNICAL SKILLS

Programming Languages: Java, SQL, JavaScript, HTML, CSS, React JS (Basics), UNIX Shell Scripting.

Cloud & DevOps: Amazon Web Services (AWS — EC2, S3, RDS, VPC, IAM, CloudWatch, Lambda), Docker, Kubernetes, OpenShift, Jenkins, Harness, Lightspeed, Git.

Frameworks & Databases: Spring Boot, Spring Batch, Spring Framework, Apache Kafka, Oracle SQL Developer, MongoDB, REST APIs, Microservices.

Developer Tools & Testing: Cucumber (BDD), JUnit, Postman, Swagger API, SoapUI, SOAP/XML, Splunk, Linux, SonarQube, Devin AI, GitHub Copilot, Agile/Scrum, JIRA, Confluence.

EDUCATION

Vellore Institute of Technology — Bachelor's in Electronics and Communication

July 2019 – April 2023

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

September 2026

Oracle Certified Associate, Java SE 8 Programmer

May 2024

AWARDS AND APPRECIATIONS

- **Special Initiative Award** – Awarded by TCS for successfully developing the proof of concept to modernize legacy batch jobs using Spring Batch.
- **On the Spot Award** – Honored under TCS Awards for Excellence for critical delivery impact and issue resolution on the Citibank CPFM project.
- **Best Employee Award** – Recognized for consistent technical execution, reliability, and leadership across project release milestones.
